Name: Jack Thornburgh

Organization: Council of Canadians, Port Alberni Chapter

Address1: 4217-8th Avenue

City: Port Alberni

Province: British Columbia

Postal Code: V9Y 4S5

Email: jthorn@portaec.net

Phone: 250-724-3800

Q1: Please briefly note the potential impacts which concern you the most regarding the proposed rejuvenation project.

A1: In a report by Senes Consulting, it is clear that the potential negative health impacts of emissions of PM10 and PM2.5 from the VIGP were underestimated. Furthermore, these fine particulates can readily travel up to 200 kilometres.

More importantly, Health Canada reports that they cannot declare with assurance any known safe levels of PM2.5 emissions. And the massive production of greenhouse gases makes the project even more unjustifiable.

Q2: Please briefly note any suggestions you have that might be considered as ways to improve the proposed rejuvenation project.

A2: Focus instead on the development of renewables.

Q3: Please note any comments you have regarding the Environmental Assessment Office review process or public consultation activities for this project application.

Q4: In particular, during the public comment period, would favour

General public meetings held by the EAO: Yes

Q5: If the project was approved, would you be in favour of establishing a community liason group to consult with the proponent? Please Comment.

Q6: Please note any comments you have regarding the Environmental Assessment Office review process for this project application.
