**Subject:** South Fraser Perimeter Road Environmental Assessment Certificate Application.

It is now time for the environmental assessment Office to stand up and be responsible in its unique function of protecting the environment.

I could list all the items previously mentioned and covered by more qualified people but the matter remains "Everything proposed under the South Fraser Perimeter Road project is detrimental to the environment"

I am not an environmentalist, I am sure you have access to considerable environmental experts. Can any of these experts support this environmentally destructive initiative?

I have not seen any environmentalists in the vicinity. Do they actually know what is being proposed? Have they actually walked the area? Or have they merely flown over in helicopters listening to "spin doctors"

I understand that there is also a Federal "Canadian Environmental Assessment Act" which has to approve the application. Have their experts walked the route or merely flown over?

Be assertive, stand up to big business and say No!! Your Children & their children will be proud that you did.
