Re: NaiKun Offshore Wind Energy Project – *Land Act* Concurrent Permitting

Dear Mr. Alexander:

I am writing in response to the request from NaiKun Wind Development Inc. for concurrent permitting relating to their application for an Environmental Assessment Certificate. The Integrated Land Management Bureau agrees to issue *Land Act* tenures associated with the project in accordance with concurrent permitting requirements.

The Integrated Land Management Bureau has received two *Land Act* applications for this project:

- Application for Wind Farm Development purposes over the core project area (Lands File 6407898);
- Application for Transmission Line Development purposes over the foreshore and upland areas required for the transmission lines to both the BC mainland and Queen Charlotte Island (Lands File 6407987).

Both of these applications have been reviewed for completeness and are considered sufficient for acceptance.

If you have any questions please do not hesitate to contact me at (250) 847-7333 or Elizabeth.Williamson@gov.bc.ca.

Yours truly,

Liz Williamson, RPF
Senior Land Officer
Skeena Service Centre
