**Subject:** RE: Review of latest proposed location of the Kitimat to Summit Lake (KSL) Looping Project pipeline

Hi Graeme, as requested by George, I am sending these comments to you directly although most of these comments may have more relevance to George for his conference call with OGC. I would think the main EAO concerns would be the ungulate winter ranges, WHMA, and UREP.

- (Map #54) Please be aware of ungulate winter ranges VD-002 and VD-004 adjacent to the pipeline, see the following website for the Order identified as U-7-011 which relates to these areas: [http://www.env.gov.bc.ca/wld/frpa/uwr/approved\\_uwr.html](http://www.env.gov.bc.ca/wld/frpa/uwr/approved_uwr.html)
- (Map #56) Please be aware of the Nechako Corridor WHMA - file #7405897, adjacent to the south side of the pipeline - see mapview layer.
- (Map #53) Pipeline crosses a UREP - see mapview layer.
- (Maps #51-52) Please be aware of the partial retention VQO around Fraser Lake where the proposed line deviates from the existing pipeline.
- Please ensure that all the major licensees, woodlot tenure holders, First Nations, and range tenure holders have been referred to. These should have been identified along the proposed route by their consultants about a year ago: 1) Satnam S. Manhas of Silverwood Consulting (ph. 250-635-0766) and 2) Stephen Neville, Land Consultant of Can-Am Geomatics BC (ph. 250-787-7171).
- Every effort should be made to have harvesting activities carried out by the major licensees/NRFLs, which will help prevent timber from being isolated.
- With the remaining volumes of timber, application should be made for an occupant licence to cut or similar licence to be determined through discussion - ensure contact is made to the Forest District rep prior to preparing application package.
- Range tenure holders have been reconfirmed in our district, please ensure referrals are made to address any of their concerns (see attached email). The area north of Fraser Lake appears to be of particular concern.

Range comments  
for PNG pipelin...

- Where there is heavy use of existing logging roads or FSR, please ensure one has a road use agreement or road permit in place.
- Please ensure that pipeline installations at logging road crossings are engineered to handle the appropriate haul loads.
- Please coordinate First Nation consultation with the Forest District Aboriginal Liaison Officer.

Thanks.

**Subject:** Range comments for PNG pipeline expansion  
Hi Gord

The gas pipeline overlaps four range agreements in the Vanderhoof Forest District, PNG should contact the range agreement holders and inquire if their activities will have an impact on range use. If concerns are identified, PNG may need to provide mitigative measures. Mitigative measures may include fencing, grass seeding ect. Here is list of Range Agreement Holders:

[RAN074354 Lillian Evans, Box 103, Fort Fraser, BC, V0J 1N0](#)

[RAN074358 Roland Beier, Box 18, Fort Fraser, BC, V0J 1N0](#)
