Due to the fact that the proponent's project is quite large (nameplate 280 MW, peak 700MW), and that the CEAA and other federal legislation is triggered, and there are many complexities and risks to be identified and weighed, and that the public consultation period on the Draft Terms of Reference is only 30 days, ending October 17, 2007, that pursuant to s.7 of the Public Consultation Policy Regulation, and sections 13 and 24(4) of the Environmental Assessment Act, application is hereby made to extend the period for public comment to December 15, 2007 (the full 75 days allowable) so that further submissions can be made.

Yours truly,

Shane Robinson
