

ACKNOWLEDGEMENTS

The Environmental Assessment Certificate (EAC) Application for the Interior to Lower Mainland (ILM) Transmission Project has been prepared by a multi-disciplinary team of environmental, engineering, First Nations, regulatory, and community relations specialists on behalf of British Columbia Transmission Corporation (BCTC). Preparation of this EAC Application required the coordination and dedication of biophysical, cultural, socioeconomic, and engineering disciplines to identify and evaluate potential effects of the Project as well as to recommend mitigation measures to avoid, mitigate or otherwise manage identified potential effects.

As the prime environmental consultant responsible for preparation of the EAC Application, Golder Associates Ltd. (Golder) would like to thank First Nations, public stakeholders, and regulatory agencies for their active involvement in defining the scope of the EAC Application through input on the Terms of Reference, study methodologies, route alignment alternatives leading up to the selection of the preferred route alignment, and mitigation measures and commitments. Completion of the environmental technical studies would not have been possible without the support of First Nations through their participation in field studies, including the Archaeological Impact Assessment, the evaluation of route alignment alternatives and pre-Application Technical Working Group meetings. Local and regional governments, as well as representatives from provincial and federal agencies such as the Canadian Environmental Assessment Agency, Fisheries and Oceans Canada, Transport Canada, Canadian Wildlife Service, Ministry of Environment, and BC Parks also contributed greatly to Project planning and design through their participation in various meetings to help clarify agency policies and mandates for managing species, habitats, and land uses.

We would like to acknowledge the technical support and guidance provided by BCTC, BC Hydro Engineering, BC Hydro Properties, and BC Hydro Aboriginal Relations and Negotiations (AR&N). We are also grateful for the technical review and input provided by Fasken Matineau DuMoulin LLP on behalf of BCTC, and Lawson Lundell LLP on behalf of BC Hydro AR&N. Specifically, Golder would like to acknowledge the following individuals for their contributions and review of draft materials:

British Columbia Transmission Corporation

- Melissa Holland - Senior Project Manager, Major Projects
- Bruce Barrett - Vice President, Major Projects
- Brooke Dutka - Project Manager, Major Projects
- Donna McGeachie – Manager, Community Relations, Public Affairs
- Judy Dobrowolski – Community Relations Coordinator, Public Affairs
- Sharon Wasylik – Community Relations Coordinator, Public Affairs
- Jim Papadoulis – Manager, Transmission Strategy and Standards

- Mike Guite – Right of Way Roads Manager, Asset Program Definition
- Tom Wells – Vegetation Program Manager, Asset Program Definition
- Katrine Nielsen – Project Services Coordinator, Major Projects
- Shawn Chylinski – Environmental Manager
- Linda Beardsell – Manager, Supply Chain
- Claire Marshall – Manager, Aboriginal Relations
- Janet McQueen – Administrator, Major Projects

Melissa Holland provided overall leadership and direction for the Project, and facilitated integration of the engineering, regulatory, Aboriginal Relations, and Community Relations discipline components with Golder’s Environmental Assessment Team. We are grateful for the value-added time, effort, and perspectives that Melissa provided to ensure effective and ongoing communication, and information exchange during preparation of the EAC Application. Melissa served a pivotal role to ensure that information and data requests were delivered by the BCTC and BC Hydro team members, and provided timely review of draft materials to facilitate Golder’s environmental assessment team meeting the scheduled milestones for completion of the EAC Application.

BC Hydro Engineering Services

- Matthew Gorman - Engineering Technical Lead
- Marc Lapointe - Design Engineer, Transmission Overhead Projects
- Garry Barnett – Senior Design Engineer, Transmission Overhead Projects
- Colin Beauchamp – Forestry Engineering Field Services
- Brock Homewood – Forestry Engineering Field Services
- Blain Good – Geotechnical Engineer
- Barry Anderson – Geotechnical Engineer
- Les Giles - Mapping and Photogrammetry
- Nicole Lucas – Mapping and Photogrammetry
- Gary Belcourt – Mapping and Photogrammetry
- Ian Walker – Mapping and Photogrammetry

Special thanks are also due to Bob Reid and Don Cochrane who served as BC Hydro’s Engineering Technical Lead during the initial stages of the Project, and who provided valuable input and technical resources during that time.

BC Hydro Aboriginal Relations and Negotiations

- Keith Anderson – Senior Manager, Consultation and Negotiations
- James Ross – Senior Negotiator and ILM Team Lead, Aboriginal Relations and Negotiations
- Charles Littledale – Aboriginal Relations Coordinator
- Corry Archibald – Aboriginal Relations Coordinator
- Jennifer Hooper – Aboriginal Relations Coordinator
- Randall Sweet – Aboriginal Relations Coordinator
- Darrell Mounsey, Aboriginal Relations Coordinator
- Carrie Oloriz – Traditional Use Specialist
- Eric Denhoff – Chief Negotiator

BC Hydro Properties

- Tony Lee – Manager, Acquisitions & Properties
- Lisa D’Errico – Property Representative, Acquisitions & Projects

Fasken Matineau DuMoulin LLP

- Sandy Carpenter – Legal Counsel for BCTC

Lawson Lundell LLP

- Keith Bergner – Legal Counsel for BC Hydro Aboriginal Relations and Negotiations

BC Environmental Assessment Office

Golder Associates would also like to recognize the commitment and guidance provided by the Environmental Assessment Office during review of the draft Terms of Reference, during pre-Application review meetings with various regulatory agencies, and during facilitation of Technical Working Group meetings. Golder would like to acknowledge the following staff at the EAO:

- Brian Murphy, Project Assessment Director
- Joe Truscott, Project Assessment Manager
- Jennifer Anthony, Project Assessment Manager
- Janet Mackenzie, Project Assessment Officer
- Rachel Shaw, Project Assessment Officer

Environmental Assessment Team

Golder would like to acknowledge its Project team and sub-consultants for their invaluable contributions and dedication in preparing the EAC Application for the ILM Project. The Environmental Assessment Project Team consisted of the following management team and discipline-specific personnel:

Environmental Assessment Management Team

- Don Gamble and Sean Weston – Project Management and Coordination
- Gail Wada and Julie Takasaki – Project Coordination and Progress Reporting
- Mark Johannes – Cumulative Effects Assessment
- Alan Calder – Environmental Assessment Advisory Support
- Jennifer Ellis, Nicole Bryer, and Arlene Dioquino – Project Administration and Document Production
- Colin Bakermans, Mandy Mo, Angel LeBlanc, Julie Werner, and Brian Ludwar – GIS and Mapping Support

A special thanks to Sean Weston, who coordinated the preparation of the discipline-specific technical reports among Golder's environmental assessment team, who worked closely with BCTC and BC Hydro's Engineering and AR&N team for input on these reports, and who was the lead author in drafting the EAC Application. His dedication, patience, and ownership of this role is greatly appreciated.

We would also like to acknowledge Jennifer Ellis, Nicole Bryer and Colin Bakermans for their dedication and support to the Project and for their tireless efforts to coordinate with the Project team and BCTC to meet all key milestone deliverables within the schedule.

Environmental Assessment Disciplines

1	Fisheries and Aquatic Habitat	Duncan Hendricks, Nancy Elliott, Tom Willms, Kim Poupard, Brian Ludwar, Shawn Redden, and Rob Hoogendoorn
2	Geotechnical and Natural Hazards	Terry Rollerson, Brian Mylleville, Mark Goldbach, Mark Johannes, Upul Atukorala, Viji Fernando, Russ Wong, Ross Holmes, and Neil Goeller
3	Surface Water Hydrology and Groundwater	Chris Coles, Peter Morgan, Rudy Sung, and Matthew Munn
4	Archeological and Cultural Resources	Ben Hjermstad, Andrew Mason, Bonnie Campbell, Gail Wada, Chris Dodd, Nola Markey, Casey O’Neil, and Ian Streeter
5	Agricultural Land Use	Pat Brisbin
6	Land and Resource Use	Ethan Askey, Jon Hopper, Sean Weston, and Heather Lamson
7	Visual Quality	Kevin Graham
8	Contaminated Sites	Dawn Flotten, Robert McLenehan, and Scott McGregor
9	Air Quality	Rachel Wyles, Greg Unrau, and Chris Madland
10	Noise	Teresa Drew and Hayley Shearer
11	Socioeconomics	Pascale Mera, Jennifer Pouliotte, Roxanne Scott, and Susan Ross
12	Traditional Use Studies Support	Ben Hjermstad, Craig Candler, Towagh Behr, and Shauna Francis
13	Public Health	Geordie Clyde and Peter Chapman
14	Terrestrial Wildlife and Vegetation	Shawn Hilton, Chris Albrecht, and Pablo Jost (Keystone Wildlife Research Ltd.)
15	Urban Land Use	Andrew Baigent, Brian Patterson, and Catherine Simpson (Urban Systems Ltd.)
16	Forestry Land Use	Stirling Angus and John Howe (JCH Forestry Ltd.)
17	Radio Interference and Electric & Magnetic Fields	Adishesu Nyshadham and Kevin Giddings (DVT-Solutions Inc.)
18	Public Health and Electric & Magnetic Fields	Linda Erdreich (Exponent, Health Sciences Practice)
19	Property Value Assessment	Larry Dybvig and Andrea Franz (Grover Elliott & Company Ltd)
20	Historic Research	Harold D. Kalman and Meg Stanley (Commonwealth Historic Resource Management Ltd.)
21	Palaeontology	Edward H. Davies (Alberta Palaeo-Resources Ltd.)
