

2019 Monarch Mountain Conservancy Alpine LTEM site General Notes

- Surveyors Jeanette D'Eon, Darren Fillier, Emma Upton, Ryan Lapointe (TRTFN)
- Site visit on July 23, 2019 Monarch Mountain summit area, Atlin BC.
- Weather; Sunny/Intermittent rain. Temperature 14C to 18C throughout the day.
- Several species were found in the Alpine LTEM area that were not listed in the established plots;
 - Juniper
 - Stone Crop
 - Yarrow
 - Various flowering plants (ex Goldenrod)
 - Stunted fir/pine
- Most flowering plants were past bloom, therefore timing of subsequent visits would benefit of being earlier in the season.
