# Illecillewaet River at Revelstoke

Code # 111031
Project # 87 RPP 8

Requested by: -H. Nesbitt-Porter
Rivers Section

-J. Dyck,
Regional Water Manager
Region #4

Field: April 29, 1987
Office: June 15 to June 30, 1987

The survey was carried out under good weather conditions by a 4-man crew under the supervision of T.M. Dignan.

## Survey Logistics:

Five (5) cross sections numbered 35, 45, 44, 34 and 43, as established by projects 82 RPP 4 and 86 RPP 2 were rerun from original control.

One (1) new cross section numbered 47, located between cross sections 44 and 45, was run and tied to the original control base (Geodetic Survey of Canada vertical datum and assumed local horizontal control)

All cross sections are marked by bridge bolts or rebar on each bank.

The data was computed, compiled and stored on VAX/VMS by R. Edward.

## Data Returns:

To Mr. J. Wester, Head, Rivers Section,
for distribution as required:

- 2 volumes containing cross section profiles
- 2 copies each of full size cross section plots
- Air photo enlargement - scale 1:4320 (approx.) showing cross section locations

One copy of complete data and half-size plots to Surveys Sections

T.M. Dignan
Party Chief
