NOTES

1) This plan has been prepared by the Ministry of Environment, Lands and Parks, Province of British Columbia.

2) SURVEY DATA:
   a) Field surveys were carried out by the Technical Support Section, Hydrology Branch, Water Management Division.
   b) Horizontal control was established by EDM traverse using a total station theodolite.
   c) Vertical control was established by differential levelling in combination with reciprocal height traversing using a total station theodolite.
   d) Cross section and topographic data were obtained using a total station theodolite.

3) DATUM:
   a) Horizontal control of cross sections is based on survey control established by Water Management Division for project 75–F2 in June, 1977.
   b) Coordinates are Universal Transverse Mercator, Zone 10, NAD27.
   c) Vertical Control is based on Geodetic Survey of Canada Bench Marks, as obtained from Surveys and Resource Mapping Branch.
   d) Elevations are in metres and referred to Geodetic Survey of Canada datum, quadrant #48123, revision #1, September 1972.

4) MAPPING:
   Compilation of B. C. Geographic System mapsheets produced by Map Production Division, Surveys and Resource Mapping Branch, Project #89–001, Scale 1:5000
   a) Contour interval of 1 metre and greater; spot elevations shown to 0.1 metres, with accuracy to +\- 0.3 metres, except where shown.
   b) Grid origin referred to U.T.M. Projection Zone 10.

5) FIELD BOOKS:
   Survey data are recorded on disc labelled 2615D and Field Book # 2615–F1, and 2615–F2.

6) REFERENCE POINTS:
   a) Water Management Division
