FRASER VALLEY

HIGH WATER MARKS

Project No. : 9039E003 Requested By : E. Bonham, Director

Code No. : 009003

Field : November 11 thru 16, 1990

Office : November 19 thru December 4, 1990

The field survey was carried out under adverse weather conditions by a four man crew under the supervision of B. C. Boyd.

Elevations of high water marks resulting from the November 10/11, 1990 flood event were obtained for the following areas:

Chilliwack River	- 14 HWM's
Vedder River	- 28 HWM's
Coquihalla River	- 16 HWM's
Legace Creek/Hatzic Lake	- 3 HWM's
Frosst Creek/Cultus Lake	- 5 HWM's
Silverhope Creek	- 9 HWM's
Sumas Prairie	- 8 HWM's

As requested by D. Findlay, Rivers Section; a centreline profile of the Wilson Road Dyke was obtained. 0+000 was established at the downstream end and extended upstream to Chilliwack Lake Road.

All elevations are in metres and referred to Canadian Geodetic Datum (NAD27).

Data recorded in Field Book 2568-L1.
