

NOTE:

This information is considered historical as it represents channel conditions and configuration at the time of the survey only. User must accept responsibility of ensuring that the accuracy and completeness of provided data is suitable for the needs of the project or study. It is provided "as is" without warranty of any kind, whether express or implied. Under no circumstances will the Government of British Columbia be liable to any person or business entity for any direct, indirect, special, incidental, consequential, or other damages based on any use of this information.

NOTES

1) This plan has been prepared by the Ministry of Environment, Lands and Parks, Province of British Columbia.

2) SURVEY DATA:
   a) Field surveys carried out by the Technical Surveys Section, Hydrology Branch, Water Management Program.
   b) Horizontal control established by EDM traverse using total station theodolite.
   c) Vertical control established by differential levelling in combination with reciprocal height traversing using total station theodolite.
   d) Cross section and topographic data obtained using total station theodolite.
   e) Global Positioning System (GPS) ties along traverse obtained using Magellan ProMark V (Carrier Phase Differential) and processed using BCACS–Penticton.

3) DATUM:
   a) Horizontal control of cross sections based on British Columbia Control Survey Post Border Monument 143.
   b) Coordinates are Universal Transverse Mercator, Zone 11, NAD83.
   c) Vertical Control based on British Columbia Control Survey Bench Marks as obtained from Surveys and Resource Mapping Branch listing dated May 12, 1995 and Geodetic Survey of Canada Bench Marks, quadrant #49118, revision #2, October 1982, and quadrant #49119, revision #4, April 1988.
   d) Elevations in metres and referred to Geodetic Survey of Canada datum – CVD28.

4) MAPPING:
   Compilation of B. C. Geographic System mapsheets produced by Lands Services Division, Surveys and Resource Mapping Branch (SRMB), Topo/GIS Section, Project #90–064, dated Feb/Mar 1993. Mapping produced at Scale 1:5000, from April 1991 air photography.
   a) Contour interval of 1 metre and greater; spot elevations shown to 0.1 metres, with accuracy to +\– 0.3 metres, except where noted. Contact SRMB for further details on base mapping specifications.
   b) Grid origin referred to U.T.M. Projection Zone 11, NAD83.

5) FIELD BOOKS:
   Survey data are recorded on disc labelled 2657D and Field Book # 2657–L1.

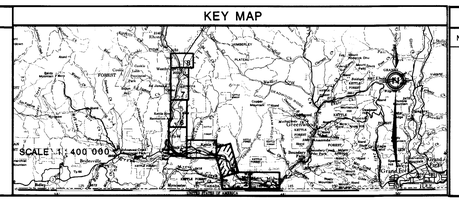

6) REFERENCE POINTS:
   a) Geodetic Survey of Canada

Bench Mark	Elevation
GSC 423 J	588.049
GSC 79C451	587.171
GSC 79C450	592.798
