DOMINION WATER AND POWER BUREAU

STATION No. 8NL24 Lat 49° 27' 47" Long 120° 30' 35"

DESCRIPTION OF RIVER STATION Map 92 H/7

Tulameen {RIVER}

at Princeton near Prov. B.C.

Established August 3, 1950, by J. Illington

Name of Observer David Muir P.O. Address Princeton

pay $5.00/mo. distance ½ mi. frequency of observation daily

(#3 volume, p.2)

Location of station with respect to towns, bridges, highways, railroads, tributaries, islands, falls, dams, etc. On Highway Bridge at North end of Main Street of Princeton Bridge

Description and location of the gauge. If chain gauge or wire weight, give length from end of weight to the first marker. Canfield Wire Weight Gauge on upstream side of vehicle lane near the right bank of the bridge. Gauge Chain Standard Corbin Lock

Description of the equipment from which measurements are made

At high water - from upstream pedestrian walk using Type A reel and 100 lb. wt.

At low water by wading about 3m/s above right bank bridge

Location and description of initial point for soundings.

Right bank Bridge Abutment

Channel above the station: straight for about 500 feet, water swift, etc.

Channel below the station curved for about ..... feet, water swift, etc.

Right bank: high wooded

Left bank: high clean or etc.

Bed of the stream: rocky, gravel,

21982-2 information obtained

Levelbook Sept 13/77

Page 11 - 12 B.Seh + R.G. Harris

Number of channels at low and high water, approximate depth of water, etc.

One channel Water 2 ft. deep at GH 22.00 ft.

Note any condition which may affect the measurement, etc.

Possible backwater at high stage from Similkameen River

Bench-marks: Describe fully, give elevation above zero of the gauge and above sea-level or other datum, if possible; make sketch bringing out the principal features.

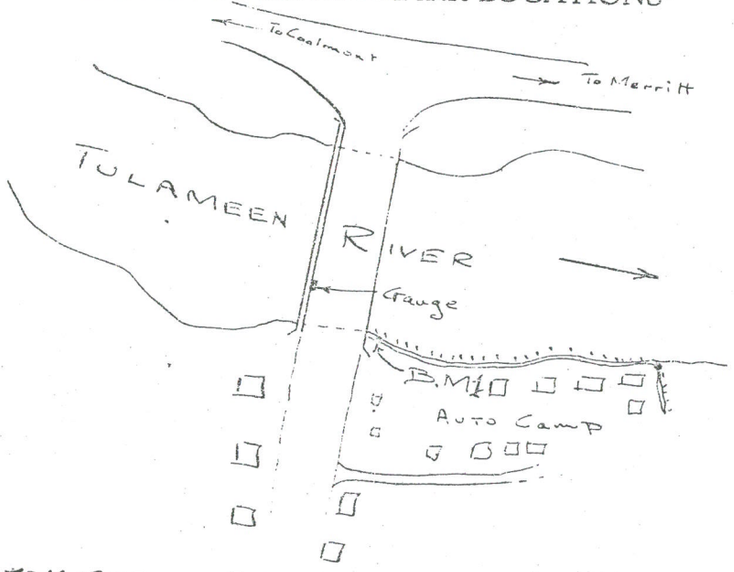

B.M.1 - Standard brass plug set in top of concrete retaining wall at East end of right bank bridge abutment. Elev. 29.66 above zero of gauge.

2083.82 G.S.C.

Gauge 0' 2054.16/626.108m

Take sufficient soundings to develop a cross-section of stream bed and, by use of level, develop banks to above high-water mark. Refer all elevations to gauge datum.
