GOVERNMENT OF BRITISH COLUMBIA

MEMORANDUM

TO Mr. G. Waberski,
Surveys Section,
B.C. Water Resources Service,
Buildings.

FROM D. A. White,
Field Operations Division,
Surveys & Mapping Branch,
B.C. Lands Service,
Buildings. 29 January, 1976

SUBJECT Field Control - Fitzsimmons Creek

OUR FILE S29

YOUR FILE 75-F11

The following is pertinent to the field control of Fitzsimmons Creek, which was surveyed between October 14th and 24th, 1975:

- Elevations are based upon Geodetic Datum derived from Geodetic Bench Mark #593J.
- Bearings are Astronomic, derived from the south boundary of Lot 3483, Official Plan No. 20T526, Township 1, New Westminster District.
- Co-ordinates are assumed, with the north-west corner of the bridge being N5000, E2000.
- Three map control points were co-ordinated, i.e. the north-west bridge corner, the south-east corner of the cabin and a road intersection. These points appear on Sheet No. 2 of Surveys and Mapping Branch Project No. 75-46T.
- Approximately 4,000 feet of Fitzsimmons Creek's course were traversed and eight cross sections were measured.

Additional information can be obtained from ~~from~~ the undersigned (387-3163).

David A. White,
Field Survey Section.
