WHISTLER-PEMBERTON
HIGH WATER MARKS

Project No.: 9129F022
Code No. : 020022

Requested by: H.H. Nesbitt-Porter, P. Eng.
A/Head, Rivers Section
Water Management Division

Field : September 5-9, 1991

Office: October, 1991

The field survey was carried out under favourable conditions by a two man crew under the supervision of T. Dignan.

High water marks in the Pemberton area, as established by Special Projects Section on August 31, 1991, were identified and levelled.

In addition, high water marks in the Whistler lakes area were obtained, as requested by R. Nichols, P. Eng.

Elevations quoted are in metres and referred to Canadian Geodetic Datum.

One volume of data each was supplied to Rivers Section and Special Projects Section. The original copy is on file at Technical Support Section.

October 31, 1991
