

82 J/6
 MOUNT ABRUZZI
 KOOTENAY LAND DISTRICT
 BRITISH COLUMBIA
 Scale 1:50,000
 Eschelle 1:50,000
 1980 Edition

1. Explanatory Notes
 This map represents a biophysical classification for wildlife capability. It is based on the analysis of topographic, climatic, and soil data. The map is intended to provide a general overview of wildlife capability in the area. It is not intended to be used as a basis for specific wildlife management decisions. The map is based on data collected from 1975 to 1978. The map is based on data collected from 1975 to 1978. The map is based on data collected from 1975 to 1978.

This example would be interpreted as follows:
 A triangle with a white dot in the center represents a mountain peak. The text 'MOUNTAIN PEAK' is written above the triangle. The text 'CONTOUR INTERVAL 100 METERS' is written below the triangle.

3. Upland Species Symbols

1. White Deer
 2. Mountain Sheep
 3. Mountain Goat
 4. Moose
 5. Elk

4. Capability Classes
 CLASS 1 - Land in this class has very high capability to support the upland species species. This class is based on the analysis of topographic, climatic, and soil data. The map is based on data collected from 1975 to 1978. The map is based on data collected from 1975 to 1978. The map is based on data collected from 1975 to 1978.

5. Biophysical Upland Capability Class Carrying Capacity Estimates

Species	Class 1	Class 2	Class 3	Class 4	Class 5
White Deer	100	50	25	10	5
Mountain Sheep	50	25	10	5	2
Mountain Goat	25	10	5	2	1
Moose	10	5	2	1	0
Elk	5	2	1	0	0

6. Environmental Conditions
 The map is based on the analysis of topographic, climatic, and soil data. The map is based on data collected from 1975 to 1978. The map is based on data collected from 1975 to 1978. The map is based on data collected from 1975 to 1978.

7. On-Site Symbols

1. Dotted line: indicates the location of a stream or river.
 2. Solid line: indicates a road or path.
 3. Dashed line: indicates a boundary or fence line.

8. References
 The map is based on the analysis of topographic, climatic, and soil data. The map is based on data collected from 1975 to 1978. The map is based on data collected from 1975 to 1978. The map is based on data collected from 1975 to 1978.
