

# Glade Creek

## HYDROLOGIC FEATURES and SEDIMENT SOURCES

Scale - 1:30,000  
Contour Interval: 20m

Date: January 2001

### TERRAIN STABILITY

(East 1/2 of Study Area only)

- Class IV
- Class V

(West 1/2 of Study Area only)

- Slope > 60%

### Cartographic Legend

- Study Area
  - Hydrologic Unit
  - H60 Line (1494 m)
  - Private Land
  - Existing Road (outside Study Area)
  - West Kootenay Power - Line 79 (Proposed)
  - Structure (w/number)
  - Proposed Clearing
- HYDROLOGIC FEATURES**
- Reach Break and Riparian Hazard
  - Channel Description Site
  - Point of Interest
- SEDIMENT SOURCES**
- Landslide
- ROADS**
- Road Segment Break
  - TYPE**
  - Active Road
  - Inactive Haul Road
  - Inactive Spur/Skid Road
- SEDIMENT PRODUCTION HAZARD**
- LOW
  - MODERATE
  - HIGH
  - VERY HIGH
